

Sustainability Accounting Immersion Programme

KEY BENEFITS

UPGRADE YOUR SKILLSETS

By analysing how to integrate various climate reporting perspectives to your organization's financial reports.

OBTAIN "THOUGHT LEADERSHIP" PERSPECTIVES

Based on authoritative international standards and universal codes of practice (e.g. IFRS, ISSB, ISAE, SSAE, ISSA, ESRS, CDP, TCFD, GRI, etc).

ADHERE TO LEADING INTERNATIONAL BENCHMARKS

ensure that the quality and transferability of your knowledge and skills gained can meet expectations and standards demanded by employers globally.

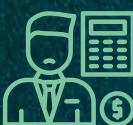

INTENDED FOR

Accounting and Finance Professionals, Finance Managers, Financial Controllers

Decision-makers like VPs, CEOs, and CFOs can use the course to draft a sustainable strategy, assess resource needs for Sustainability Accounting, and pursue sustainable targets.

Business managers and Professionals from various fields like Engineering, Operations, and Public Relations will gain an understanding of ESG implications, such as decarbonisation strategies, and learn how their efforts contribute to overall sustainability goals.

ELEVATE YOUR CAREER POTENTIAL

Add value to your current or prospective organization and stay ahead of the curve in Sustainable Finance.

GAIN PRACTICAL TIPS

Through the case studies illustrated in the courseware, you get to consider accounting for potential ESG elements/indicators and the pitfalls, even before you start.
